

TOPCOM[®]

FIDELITY 1150

Important

To use 'Caller ID' (display caller), this service has to be activated on your phone line. Normally you need a separate subscription from your telephone company to activate this function. If you don't have the Caller ID function on your phone line, the incoming telephone numbers will NOT be shown on the display of your telephone.

This product is in compliance with the essential requirements and other relevant provisions of the R&TTE directive 1999/5/EC.
The Declaration of conformity can be found on :

<http://www.topcom.net/support/cedclarations.php>

USER GUIDE

V 1.1

The features described in this manual are published with reservation to modifications.

1 Before Initial use

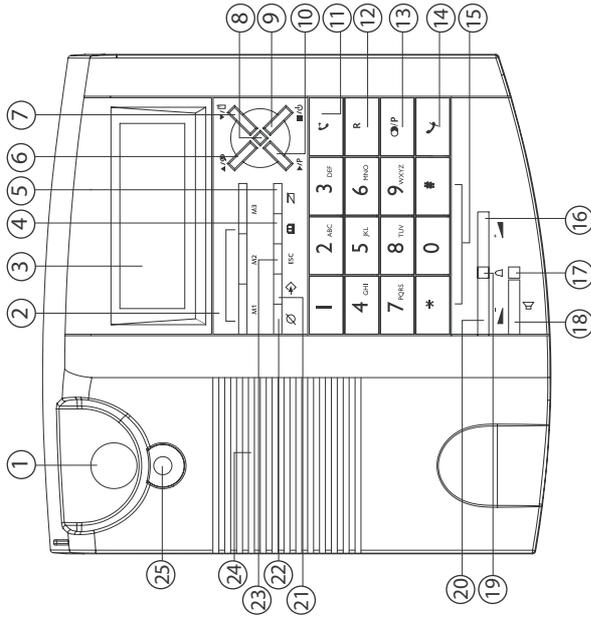

Thank you for purchasing this new desktop caller ID telephone.

1.1 Intended Purpose

This product is intend to be connected indoor to an analogue PSTN telephone line.

1.2 Caller ID

To use 'Caller ID' (display caller), this service has to be activated on your phone line. Normally you need a separate subscription from your telephone company to activate this function. If you don't have the Caller ID function on your phone line, the incoming telephone numbers will NOT be shown on the display of your telephone.

2 Safety instructions

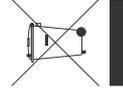

Please read carefully through the following information concerning safety and proper use. Make yourself familiar with all the functions of the equipment. Be careful to keep these advice notes and if necessary pass them on to a third party.

- Do not place the basic unit in a damp room or at a distance of less than 1.5 m away from a water source. Keep water away from the telephone.
- Do not use the telephone in environments where there is a risk of explosions.
- Dispose of the batteries and maintain the telephone in an environment-friendly manner.

3 Cleaning

Clean the telephone with a slightly damp cloth or with an anti-static cloth. Never use cleaning agents or abrasive solvents.

4 Disposal of the device (environment)

At the end of the product lifecycle, you should not throw this product into the normal household garbage but bring the product to a collection point for the recycling of electrical and electronic equipments. The symbol on the product, user guide and/or box indicate this.

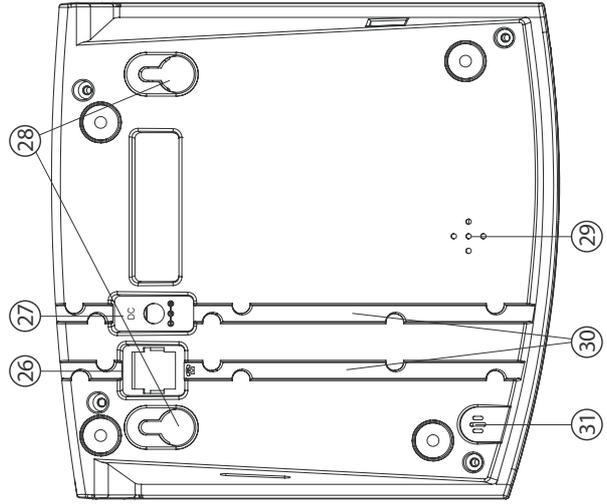

Some of the product materials can be re-used if you bring them to a recycling point. By re-using some parts or raw materials from used products you make an important contribution to the protection of the environment. Please contact your local authorities in case you need more information on the collection points in your area.

1.3 Connection

The CE symbol indicates that the unit complies with the essential requirements of the R&TTE directive.

This device has been designed and manufactured to comply with the 98/482/EC rule, referent to the Pan European connection of a terminal to the Public Switching Telephone Network (PSTN) and following the established guidelines by the 1999/5/EC Directive about radio electric equipments and the reciprocal acknowledge of their conformity. However, due to the fact that there are some differences in the PSTNs from one country to another, the verifying measurements by themselves do not set up an unconditional guarantee for an optimal working in every connection point to the PSTN of any country. If any problem comes up, get in touch firstly with the distributor.

In any case, use conditions for which the product has been created should be respected as well as avoid its use in public or private networks with technical requirements clearly different to those established in the EU.

14 Telephone answering device

 **The voice prompt language of the internal digital answering machine, will be the same as the display language.**

14.1 Activating/Deactivating the Answer Machine

2SEC  The answering machine shall turn Off
 The 'TAD On LED' shall turn off
 The answering machine shall turn On
 The LED shall burn.

2SEC  The Voice will prompt the selected OGM (see chapter 14.2)

14.2 Selecting the outgoing messages (OGM1 or OGM2)

There are 2 different outgoing messages:

OGM1 (A1): The unit shall record a message.

OGM2 (A2): The unit will not record a message after the call has been answered.

2SEC  Activate the answering machine. The selected OGM will be prompted
 Switch between OGM1 and OGM2.

 The selected OGM will be prompted and displayed on the 2 line of the display (A1 or A2)

14.3 To record an Outgoing Message

 Select OGM1 or OGM2

3SEC  After you hear a beep, release the button and start saying your outgoing message (max 2 minutes)

If the OGM is less than 3 seconds, the recording is not valid.

-  To stop the recording. The message will be played back
-  To replay the recorded OGM

14.4 To delete an OGM

-  Select OGM1 or OGM2.
-  To replay the recorded OGM
-  Press the delete button during playback. The pre-recorded message is prompted

14.5 TAD Setting

14.5.1 Selecting OGM1 or OGM2

In of the TAD setting menu, you can also select the outgoing message.

-  Enter the menu
-   Select '**TAD Setting**'
-  Enter the submenu
-   Select '**Answering**'
-  To confirm
-   Select '**Answering-A1**' (OGM1) or '**Answering-A2**' (OGM2)
-  Confirm
- ESC 2 X** To leave the menu

14.5.2 Select the number of rings

To select the number of rings before the TAD answers the call:

-  Enter the menu
-   Select '**TAD Setting**'
-  Enter the submenu
-   Select '**TAD Rings**'
-  To confirm
-   Select 2 to 9 or select T/S
-  Confirm
- ESC 2 X** To leave the menu

T/S is '**Toll Saver**'. The TAD will answer a call after 4 rings if there are no new messages, and after 2 rings if there are new messages. If there are no new messages and you call your machine to check your messages remotely, you can hang up after the 2nd ring. You do not need to pay connection fees and you know that you do not have any new messages.

14.5.3 Setting the remote PIN code

This code is necessary for remote operation (see chapter 14.11)

-  Enter the menu
-   Select '**TAD Setting**'
-  Enter the submenu
-   Select '**TAD Pin**'
-  To confirm
-  Enter the new PIN code (3 numbers)
-  Confirm
- ESC 2 X** To leave the menu

14.5.4 Call Screen Mode

When there is an incoming call you can listen to the recording without picking up the handset. You can enable or disable this function.

-  Enter the menu
-   Select '**TAD Setting**'
-  Enter the submenu
-   Select '**Call Screen**'
-  To confirm
-   Select '**Call Screen - On**' or '**Call Screen - Off**'
-  Confirm
- ESC 2 X** To leave the menu

14.6 Incoming messages

After the set number of rings the TAD will answer the call, the caller will hear your outgoing message (OGM). If OGM1 is selected, he can record a message (max 2 minutes) after the beep. As soon as you have new messages the number of new messages will be displayed. The recording will be interrupted when it detect silence for 6 seconds or when you pick up the handset.

14.7 Memo message recording

To record a Memo message

- 3SEC  After you hear a beep, release the button and start saying your Memo message (max 2 minutes)
-  To stop the recording

Memo messages will be stored together with the incoming call recordings.

14.8 Playing recorded messages

In idle mode:

-  The unit shall play the new messages

Every time a message is recorded, the date and time will also be stored if the date and time is set (see chapter 7.4). When playing back a message, the date and time of the recording will be announced before the message.

-  To pause the playback
-  <1s To replay the message
-  2 X To skip to the previous message
-  To skip to the next message
-  To stop playback

After all messages have been played, press  to re-play all messages.

14.9 Deleting one messages

During playback of the message.

-  'DELETE?' will be displayed
-  To confirm and delete the message

If no button is pressed in 30 seconds, the unit will continue playing the messages

14.10 Deleting all messages

During playback of the last message.

-  2SEC 'DELETE ALL?' will be displayed
-  To confirm and delete all messages

If no button is pressed in 30 seconds, the unit will continue playing the messages

14.11 Remote control

The answering machine can be operated remotely using a touch-tone phone (DTMF tone selection system).

- Call your machine. You will hear the OGM message.
- After the beep, slowly dial the Security code, you will hear one short beeps for confirmation.
- Enter the next codes to use the desired function.

1	Replay the message
1(1)	Play the previous message
2	Play/Pause
3	Play the next message
4	To play the outgoing message
5	To record a new outgoing message
6	Stop playback or recording
7	Delete playing message
8	Answering off
9	Answering on / Toggle OGM1 or OGM2
0	Delete all, old messages
#	Record Memo

If no button is pressed within 10 seconds, the unit will return to standby mode.

During playback, the unit will stop every 168 seconds. If no button is pressed, the unit will stop and hang up.

When pressing '2' the message playback is paused for 30 seconds. If no button is pressed the unit will hang up.

14.12 Remote activation

If the answering machine is OFF, the user can wake-up the device remotely by dialing the number and wait for 12 rings.

The machine will answer with OGM2.

Enter the remote code and follow the instructions explained in chapter 14.11.

14.13 Memory Full

There are 2 kinds of Memory Full situations.

1. During Memo/OGM/ICM recording, the memory is full.
2. The memory is full and somebody is trying to record a message.

The unit shall play a message indicating the memory is full.

When OGM 1 was selected, the device will switch automatically to OGM2 (see chapter 14.2).

15 Wall mounting

Pull out and rotate the wall mounting hook (25). Put it back in position.

Measure and mark the wall mounting locations (28).

Drill holes, fit wall plugs and screw in screws.

The cable of the telephone can be fixed in the slot (30) on the backside of the phone depending on the telephone connection position.

Mount the telephone on the screws.

16 Technical Data

Dialling options: DTMF (tone)/PULSE

Flash:100/300/600ms

Power adapter: Input 230VAC 50Hz / Output 9VDC 200 mA

17 Warranty

17.1 Warranty period

The Topcom units have a 24-month warranty period. The warranty period starts on the day the new unit is purchased. The warranty on batteries is limited to 6 months after purchase. Consumables or defects causing a negligible effect on operation or value of the equipment are not covered. The warranty has to be proven by presentation of the original purchase receipt, on which the date of purchase and the unit-model are indicated.

17.2 Warranty handling

A faulty unit needs to be returned to a Topcom service centre including a valid purchase note. If the unit develops a fault during the warranty period, Topcom or its officially appointed service centre will repair any defects caused by material or manufacturing faults free of charge.

Topcom will at its discretion fulfil its warranty obligations by either repairing or exchanging the faulty units or parts of the faulty units. In case of replacement, colour and model can be different from the original purchased unit.

The initial purchase date shall determine the start of the warranty period. The warranty period is not extended if the unit is exchanged or repaired by Topcom or its appointed service centres.

17.3 Warranty exclusions

Damage or defects caused by incorrect treatment or operation and damage resulting from use of non-original parts or accessories not recommended by Topcom are not covered by the warranty. Topcom cordless phones are designed to work with rechargeable batteries only. The damage caused by the use of non-rechargeable batteries is not covered under warranty.

The warranty does not cover damage caused by outside factors, such as lightning, water and fire, nor any damage caused during transportation. No warranty can be claimed if the serial number on the units has been changed, removed or rendered illegible.

Any warranty claims will be invalid if the unit has been repaired, altered or modified by the buyer or by unqualified, non-officially appointed Topcom service centres.
