

# Roborock S6 Pure

## Product Presentation

---

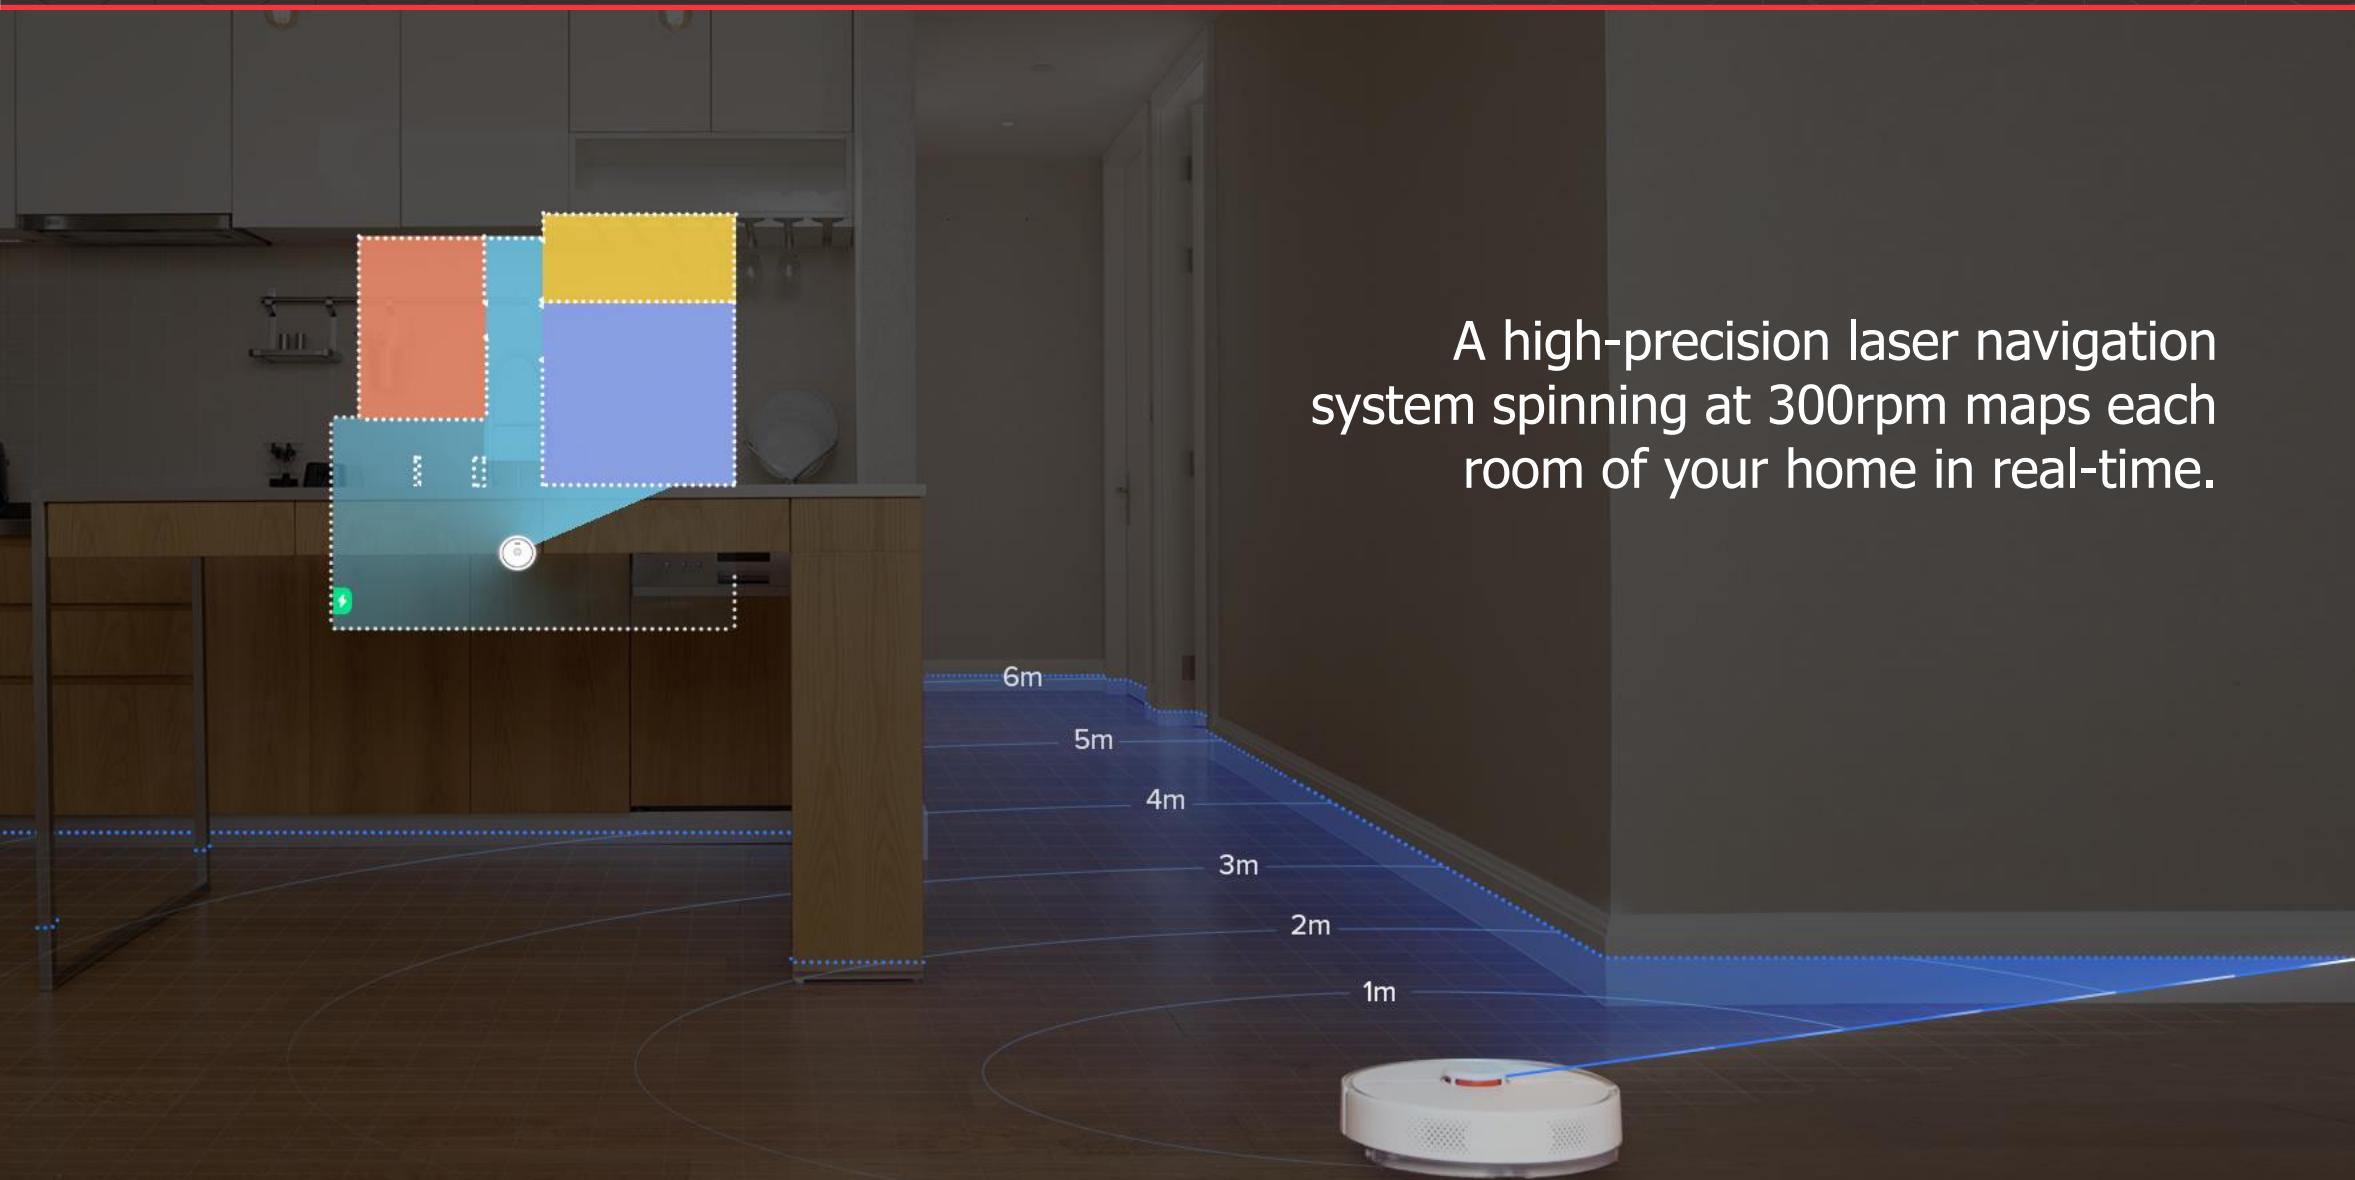

roborock

# Incredibly Smart

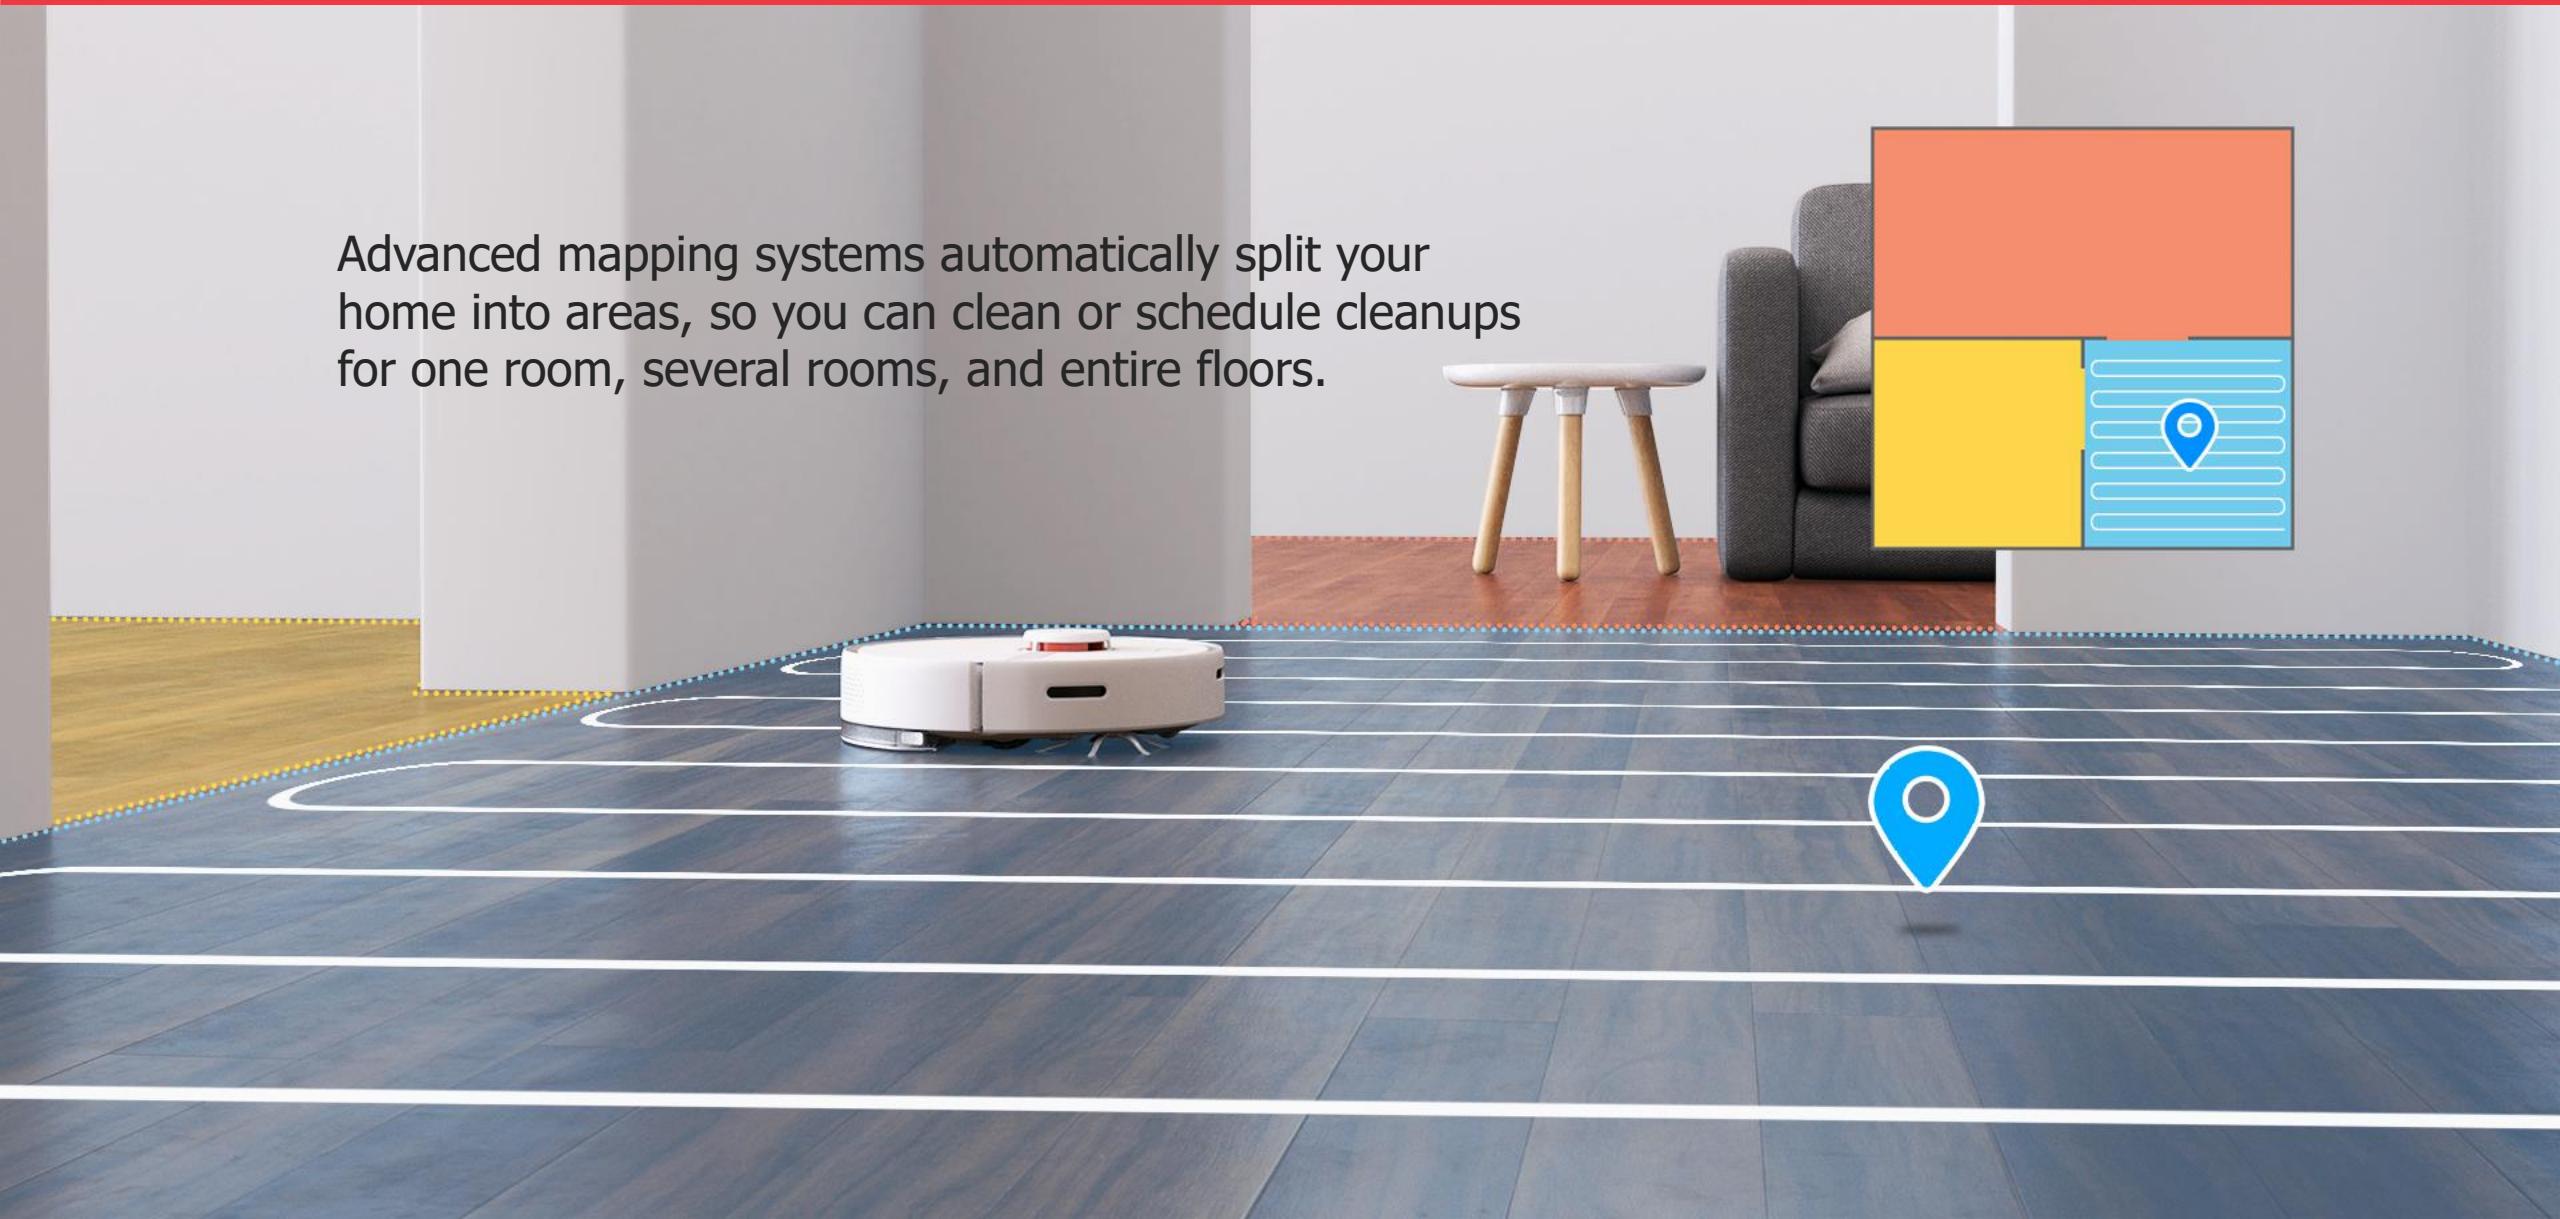

A high-precision laser navigation system spinning at 300rpm maps each room of your home in real-time.

## Incredibly Smart

Advanced mapping systems automatically split your home into areas, so you can clean or schedule cleanups for one room, several rooms, and entire floors.

# Incredibly Smart

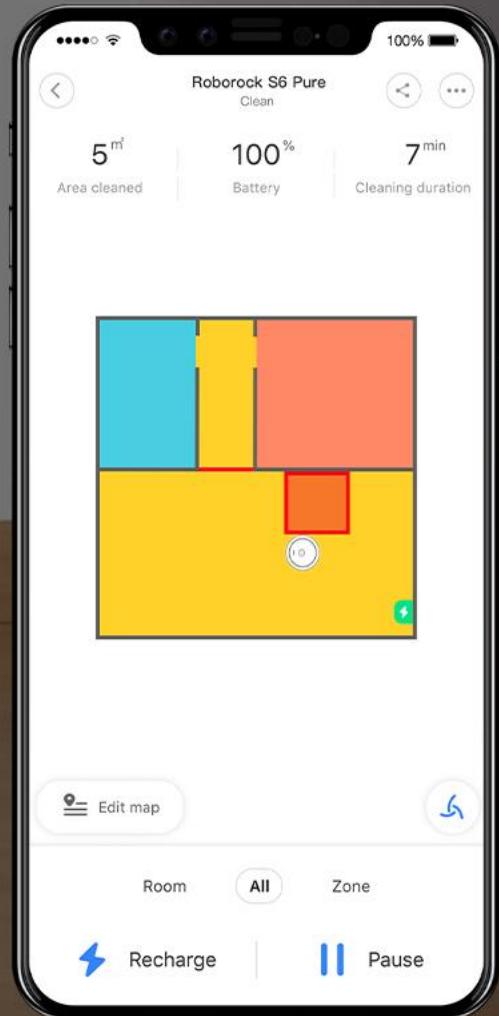

The other

**Adaptive algorithms calculate the most efficient cleaning route for each room based on shape and location of obstacles. So the cleanup is up to 15% faster\*.**

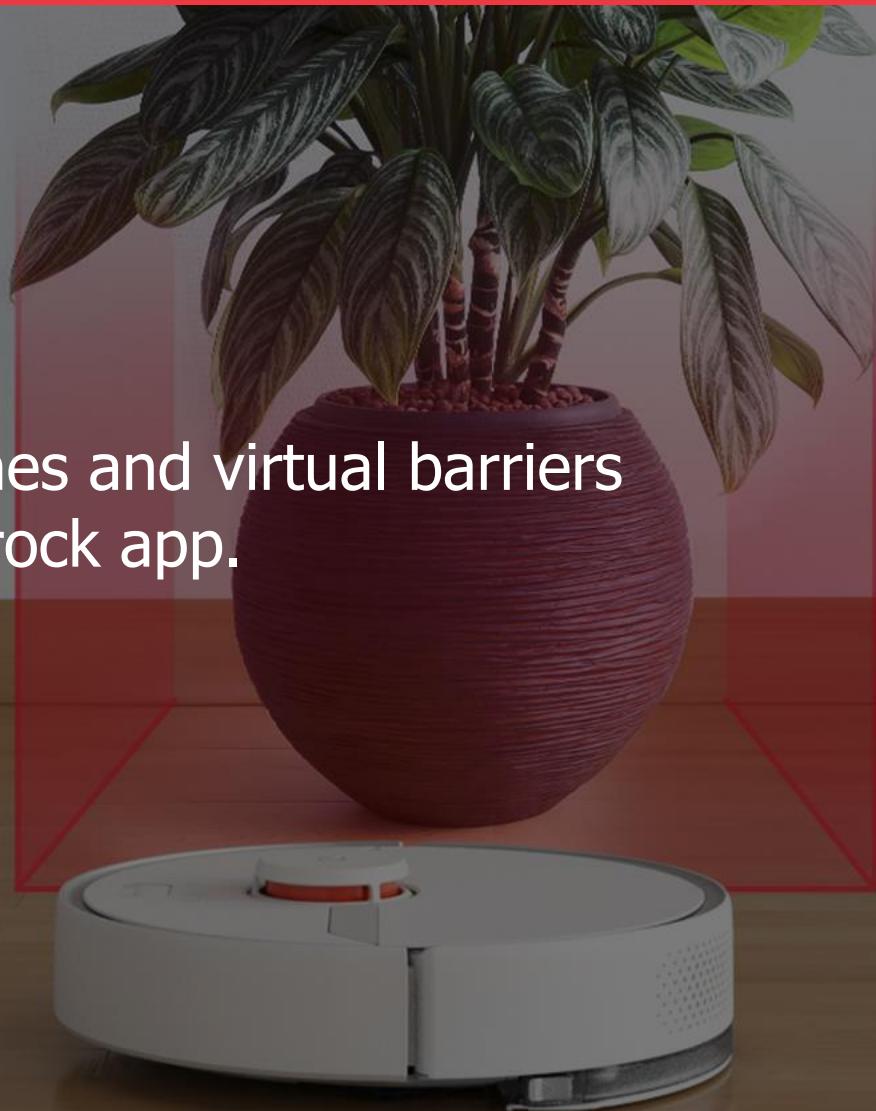

\*Compared to Roborock S5. Tested internally by the manufacturer on hard floors.

# Incredibly Smart

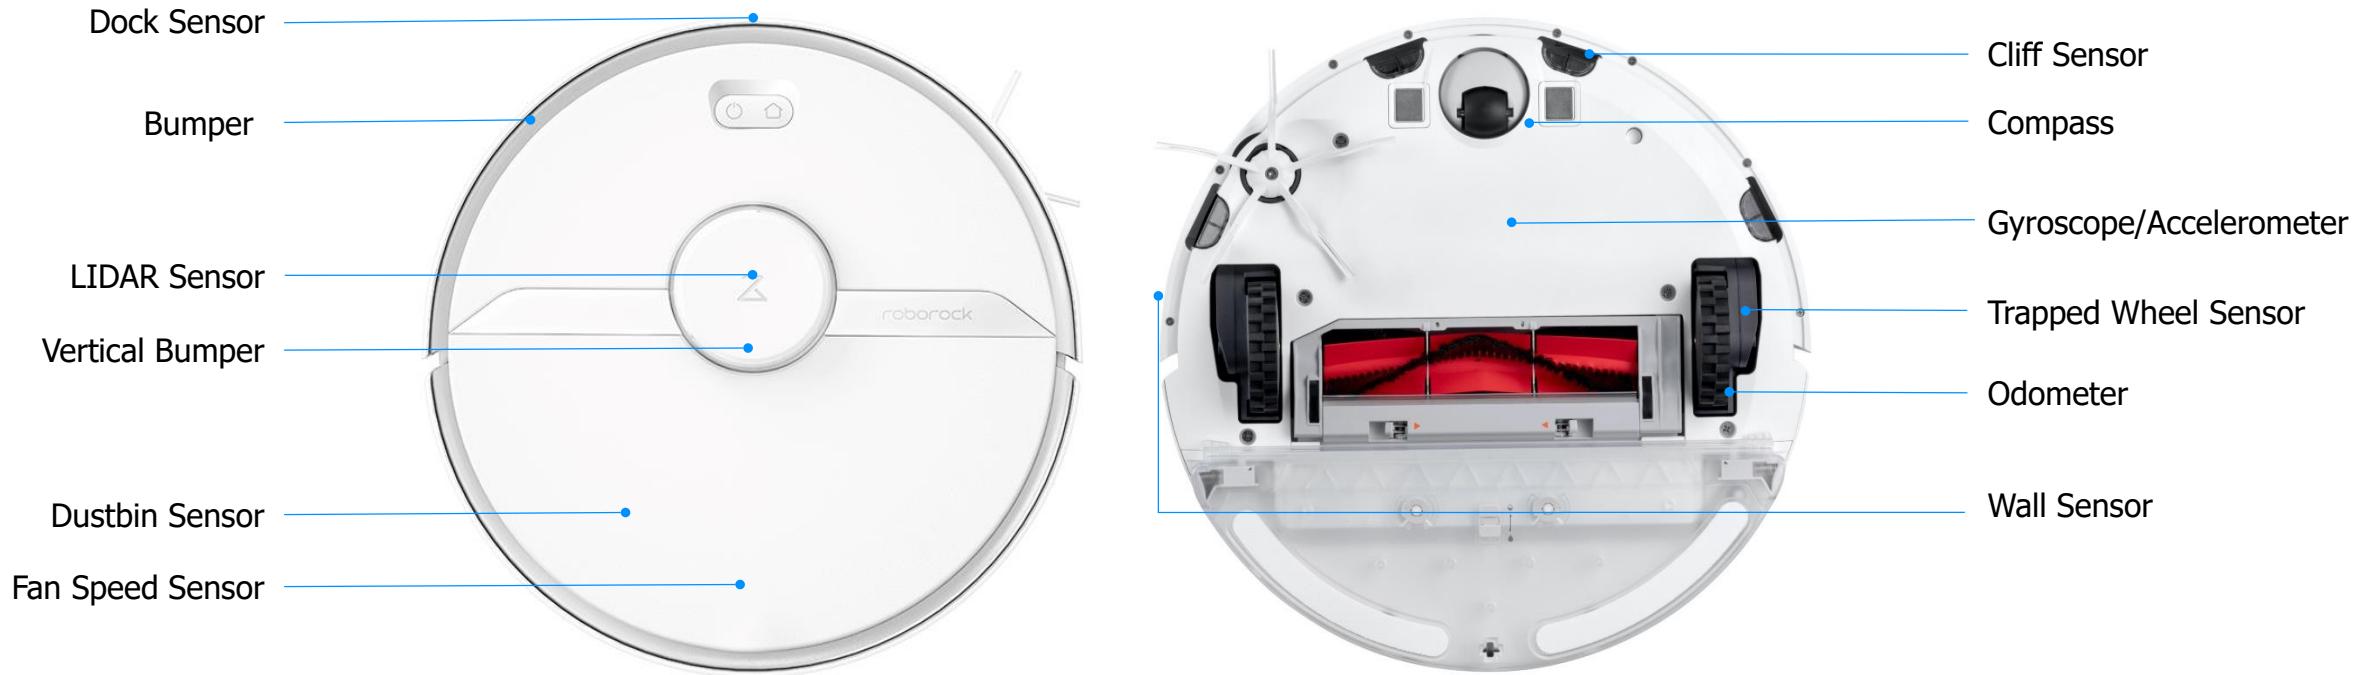

Place no-go zones and virtual barriers using the Roborock app.

# Incredibly Smart

**Thirteen sensor types collaborate to give the S6 Pure fall avoidance, carpet boost, height sensitivity, help it avoid getting stuck, and more.**

## Astoundingly Clean

Intensely powerful suction easily lifts dust from floors and pulls it out of carpets.  
automatically switching to maximum power when cleaning carpet.

Astoundingly Clean

**Equipped with a 5200mAH lithium ion powerhouse, S6 Pure can clean for up to 3-hours on one charge\* covering an area of up to 300m<sup>2</sup> (3300ft<sup>2</sup>)\***

\*Based on internal testing in Quiet mode with a full battery and with no mop system attached.

# Astoundingly Clean

**A large 180ml water tank is suitable for mopping homes of up to 150sqm (1610sqft)\* in one single clean.**

\*Based on internal testing with low water flow. Actual results may vary. Range is an estimate based on an assumption that 20% of the area is covered by furniture and will not need mopping.

180ml = 150sqm

# Astoundingly Clean

**The water flow is adjustable so mopping can be tailored to fit different needs and preferences, and water spreads evenly across the mop surface for a uniform clean.**

# Astoundingly Clean

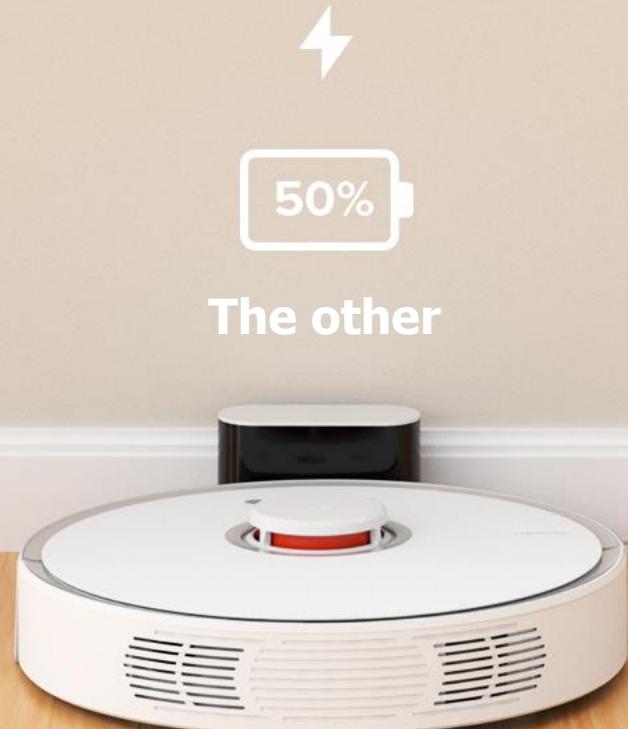

**Climbs easily over 2cm (0.8in) high thresholds and carpets, automatically switching to maximum power when cleaning carpet.**

## Durable and Long-lasting

When cleaning large spaces, Smart Top-up allows S6 Pure to return to the dock when power is low, and recharge just enough to finish the clean.

## Incredibly Smart

All key parts, from the dustbin to main brush to water tank and more are easily detachable for cleaning and maintenance.
