

CRC CLIMATE FRIENDLY ALTERNATIVES TO HFC'S!

FULLY COMMITTED TO CLIMATE PROTECTION, CRC IS LAUNCHING A NEW RANGE OF CLIMATE FRIENDLY LOW GWP PRODUCTS.

A unique logo will identify these products:

CRC Dust Off 360 & Flat Tire Fix are now available with HFO-1234ze:

1

Low Global Warming Potential (GWP=7)

2

Non-Flammable* and odourless

3

100% Ozone Friendly

THE LOWER THE GWP, THE MORE CLIMATE-FRIENDLY!

*According to directive 2008/47/EC

EUROPEAN F-GAS REGULATION:

1. To combat climate change, the EU is taking regulatory action (EU 517/2014) to control F-gasses. The F-gasses in use within Europe are HFC's (hydrofluorocarbons). One of these frequently used HFC's is R134a.
2. Effective from **1st January 2018**:
 - HFC-134a with a GWP value of 1430 can not be used anymore as a propellant for technical aerosol products.
 - The EU prohibits the marketing of all products with a GWP higher than 150!
